Projects

Chat Bot - A Realtime Code Editor | 2025,Present

, Node.JS, Express.JS, MongoDB

- In this project, we will delve into the step-by-step process of constructing a Chat-bot using the MERN Stack. From setting up the backend server to designing an interactive and dynamic front end, we will explore the intricacies of integrating capabilities to create a responsive and intelligent conversational interface.
- Comprehensive Toolset: It offers functionalities such as file management (open, edit, save, delete), code execution directly within the editor, syntax highlighting with auto-language detection, and support for various programming languages
- Real-time Collaboration: Collaborate simultaneously on code edits across multiple files with live updates

Personal Portfolio: The user interface and user experience (UI/UX) to make it more intuitive, and responsive.

| **Technologies used -**

- Designed and developed a responsive personal portfolio using HTML, CSS and JavaScript.
